

YOU'RE INVITED TO PARTICIPATE IN THE CMP DIGITAL COLLABORATIVE DESIGN RESEARCH PROJECT

You are invited to participate in a National Science Foundation-funded research project for the 2020 to 2021 school year. The project is designed to enhance student learning and promote productive disciplinary engagement. Engage your students in a new digital collaborative CMP environment. The digital platform includes the following innovative features.

- *Connected Mathematics* embedded in a digital collaborative student workspace with mathematics tools for use in face-to-face classrooms
- Collaborative tools for students to create and share work with small groups and the whole class
- Teacher dashboard for accessing and using student work to make pedagogical and classroom management decisions
- Teacher workspace to create robust just-in-time supports for individual students, small groups, or the whole class

Requirements

- Classroom set of computers and reliable WI-FI Internet access
- CMP 7th Grade Teacher
- Ability to participate in professional learning (face-to-face and/or online)
- Willingness to obtain parent and student permission
- Provide feedback following classroom implementation

Space is limited. We will confirm participation after the application window closes. Feel free to invite other CMP teachers in your math department to apply.
